

High Strength

Chemco's strongest surface protection stands up to the heaviest machinery and foot traffic. Its unique, non-porous design prevents penetration to the substrate beneath. Popular with government and military operations, this exclusive Chemco tear-resistant product is highly durable.

Available in 300' rolls:
36", 48", 60", 72"
24-Hour Shipping
All Sizes

100#-White

Chemco's best selling surface protection is as tough as it is popular. The 100# paper weight ensures durability and absorption even under constant operator traffic. Its bright white color promotes booth illumination. The 100#-White is conveniently marked with its flame retardant rating for fast, easy compliance with inspectors. Available in a wide array of sizes, this product works well on all spray booth surfaces.

Available in 300' rolls:
36", 42", 60", 72", 84"
24-Hour Shipping
All Sizes

80#-White

Chemco's highly efficient, bright white 80# surface protection is ideal for light spray operations.

Available in 300' rolls:
36", 42", 60", 72", 84"
24-Hour Shipping
All Sizes

70#-Kraft

This economical surface protection is light brown in color, easy to use, and available exclusively from Chemco in 500' rolls. Popular in mixing rooms and low-traffic areas, this product offers immediate OSHA compliance at a minimal cost.

Available in 500' rolls:
36", 42", 60", 72"
24-Hour Shipping
All Sizes

Un-Treated Kraft

As a single source supplier, we provide un-treated kraft paper for non-spray booth applications. We proudly offer 30, 40, 50, 60, and 70-pound paperweight products at competitive pricing. Rolls are available in various lengths and sizes. Contact your Account Executive for details.

Why You Need To Use Chemco's Flame Retardant Surface Protection

Virtually all fire inspectors and insurance underwriters require the use of non-combustible (flame retardant) floor and wall coverings in and around spray booths. With safety and fire regulations increasing each year, why wait for that unannounced safety inspection to get your facility compliant? For a minimal investment you can ensure the safety and fire protection of your factory and employees.

OSHA (www.osha.gov) and NFPA (www.nfpa.org) have also weighed in on the topic:

OSHA 1910.107 (b)(3) "Floors." The floor surface of a spray booth and operator's working area, if combustible, shall be covered with noncombustible material of such character as to facilitate the safe cleaning and removal of residues.

NFPA 33 Standard For Spray Application Using Flammable Or Combustible Materials 8.2 Combustible Deposits: All spray areas shall be kept free of the accumulation of deposits of combustible residues.

Chemco Solutions For Every Need

With four grades of spray booth surface protection available in various sizes, Chemco has the most diverse offering in the market today. All items ship within 24 hours from one of our three regional warehouses (Los Angeles-Chicago-Atlanta). Chemco's products come with a 100% satisfaction guarantee. Try these Chemco products for up to 30 days with no commitment to purchase the product until you've approved its performance. Roll after roll you can be sure that Chemco will consistently afford you the protection you need.

Which Chemco Surface Protection Is Right For My Operation?

In most cases, Chemco's 100#-White or High Strength will be the best product for your operation. Your account executive will assist you with selecting the right product for your operation.
