

MACH 1 HVLP

The MACH 1 is a full size HVLP spray gun with special nozzles and modifications that allow it to operate at high transfer efficiencies in compliance with the California South Coast Air Quality Management District (SCAQMD) regulations as a high volume low pressure (HVLP) air spray gun.

Constructed of a lightweight drop-forged aluminum body and stainless steel fluid passages, including long life self-adjusting packings, this spray gun is designed to stand up under hard, continuous use. It operates like a conventional spray system utilizing compressed shop air.

Technical Specifications

- Body: Drop-forged aluminum
- Weight: 20.1 Oz.
- Air Inlet: 1/4" NPS (m)
- Fluid Inlet: 3/8" NPS (m)
- Fluid Passages: Stainless Steel
- Feed Type: Pressure / Siphon Feed
- Part Sheet: 77-2463
- Gun Repair Kit: 54-3605

Most Popular Nozzle Set Ups:

- MACH 1 94 - 94P
 - MACH 1 94 - 93P
 - MACH 1 92 - 94P
 - MACH 1 91 - 94P
- Standard Fluid Nozzle and Needle are 303 Stainless Steel

See page 15 for additional standard and specialty fluid nozzle recommendations.
