

ProBell[®] Rotary Applicator

High Performance Rotary Bell Atomizer System

PROVEN QUALITY. LEADING TECHNOLOGY.

High Performance, Scalable System

Graco's new ProBell rotary atomizer offers high performance spraying with intuitive controls and a scalable design. By giving you the flexibility to start small with one controller or install a complete system all at once, accommodating your specific installation and budget has never been easier. The ProBell is also precision balanced for low vibration up to 60,000 RPM's – allowing you to achieve high production speeds for your industrial application.

In addition to delivering superior quality, high transfer efficiency and precision spraying, the ProBell applicator is lightweight and compact for lower payload robots or reciprocators.

Available in two versatile styles, the ProBell has a standard model for solid wrist robot, reciprocator or fixed mount. While the hollow wrist robot model makes maintenance easy with a quick disconnect plate that allows you to remove the applicator from the robot without touching hose connections.

SOLID WRIST ROBOT

HOLLOW WRIST ROBOT

RECIPROGATOR OR FIXED MOUNT

Scalable

Modularity allows customers to design a system to meet their production needs and budget – big or small

Choose up to 4 controllers to improve spray performance and data management

Simple Installation

Easy system integration with existing PLC or new installation

User-Friendly Controls

Controller interface allows for easy management of spray parameters

Durable & Safe

Improved safety and reliability with a low voltage cable and adjustable arc detection settings

Optimized Spray Performance

Dual shaping air and bell cup design for superior atomization

Designed for Performance

The ProBell provides the highest spray performance and transfer efficiency thanks to our dual shaping air and bell cups. Each applicator delivers superior quality, precision spraying with uniform atomization and an easily adjustable spray pattern for the most demanding finishing applications. All components are made of high quality, durable materials for safe, trouble-free operation.

FLEXIBLE

- Lightweight hollow wrist robot model is only 13.5 lbs with the standard model lighter (9 lbs)
- Compact size and small diameter allow for spraying in tight spaces
- Mounting styles: hollow wrist robot, solid wrist robot, fixed or reciprocator mount

EASY TO SERVICE

- Hollow wrist robot model connects hoses with a quick disconnect plate
- Removable shroud allows for access to key components
- Few parts for quick and easy maintenance

SAFE

- 100 kV power supply with a low voltage cable connection improves safety while reducing system complexity
- Arc detection shuts off electrostatics to ensure a safe environment

MATERIAL VERSATILITY

- Coiled fluid tube for a wide range of material resistivity
- Waterborne models for use with isolated material systems

PRODUCTIVE

- 3 fluid valves located at the front for quick color change and material savings

up to 60,000 RPM
Precision balanced for low vibration
and high production speeds

Better Pattern Shape. Better Transfer Efficiency.

Dual shaping air improves pattern shape and transfer efficiency for better overall finish quality.

DURABLE

- Stainless steel air cap cover protects bell cup and air cap
- Air bearing has no parts to wear out
- Turbine assembly is a proven design

Precision Bell Cups

Bell cups are optimized for superior spraying with a variety of pattern sizes and flow rates. Available in 2 different aluminum finishes (including high wear for abrasive materials) or composite construction.

SMOOTH BELL CUP

The smooth edge cup has optimum durability and works well for many metalics.

SERRATED BELL CUP

Because the serrated cup edge has equally spaced axial grooves that act as channels for paint flow, it provides better atomization and uniform particles. This makes it ideal for difficult to atomize paint and clear coats.

Certification

BELL CUP CERTIFICATION

Every bell cup is tested and delivered with a certificate indicating the spray pattern size and precision balanced cup meet stringent Graco requirements so you can be assured a quality product.

Think Big. Start Small.

Easily Expand your Control Options

Not everyone has the need or budget for a fully-decked out system. Graco's unique approach to rotary atomizers makes it easier for you to get exactly what you need without breaking the bank. The scalable design allows you to start small with 1 controller and work your way up to 4 to further improve performance and data management. These user-friendly controls are easy to learn and operate.

ELECTROSTATIC CONTROLLER

Electrostatic Controller

Precise control is critical to your rotary atomizer application. Our electrostatic controller keeps you connected to what's going on every minute of every day, detects unsafe electrostatic conditions and allows you to change parameters on the fly to improve performance.

- Voltage and current can be independently adjusted to meet specific manufacturing requirements
- Full system integration with PLC or switch box control
- Improves safety by automatically shutting off electrostatics when the part is too close to the gun

MANUAL AIR CONTROLLER

Speed Controller

- Precise management of turbine speed for superior material atomization
- A magnetic speed reader in the bell provides reliable communication
- System logic controller provides user friendly operation

SPEED CONTROLLER

Air Controller

- Electronic Model: Precision operation and communication for all air controls
- Manual Model: Individual regulators for air control

System Logic Controller

The key to the System Logic Controller is its ability to control and manage your ProBell with the touch of a button.

- User friendly operation of all system functions
- Eliminate guesswork with maintenance reminders and system logs
- Runs two ProBell applicators from one controller
- Provides one centralized control of ProBell and fluid management when used with ProMix PD2K Integrated proportioner

With 99 presets, the shaping airs, bell rotational speed, and electrostatics can be precisely set for various part configurations.

Intuitive controls allow for simple operation of spray function, such as cup wash, purging, and flushing.

One screen shows exactly how your ProBell is functioning — spraying and electrostatics.

Ordering Information

Choose a pre-configured system, and you'll get all the components you need – the applicator, hoses and controllers. Or build a custom system that is as unique as your application. Whatever you choose, Graco has you covered.

All systems are built on a cart with hoses and lines connected to the mounted controllers. Once the system arrives at your facility, simply position the cart booth side, mount the ProBell applicator and connect lines to the ProBell and fluid source. Installation made easy!

Select a Pre-Configured System

With this option, it only takes one part number to order a complete ProBell system. Simply find the system and part number that best matches your requirements.

Solventborne ProBell Systems include: applicator, 20 meter (65ft) hose bundle, cart with electrostatic controller, speed controller, electronic air controller, system logic controller, and filtration system.

ABOUT GRACO

PROVEN QUALITY. LEADING TECHNOLOGY.

Founded in 1926, Graco is a world leader in fluid handling systems and components. Graco products move, measure, control, dispense and apply a wide range of fluids and viscous materials used in vehicle lubrication, commercial and industrial settings.

The company's success is based on its unwavering commitment to technical excellence, world-class manufacturing and unparalleled customer service. Working closely with qualified distributors, Graco offers systems, products and technology that set the quality standard in a wide range of fluid handling solutions. Graco provides equipment for spray finishing, protective coating, paint circulation, lubrication, and dispensing sealants and adhesives, along with power application equipment for the contractor industry. Graco's ongoing investment in fluid management and control will continue to provide innovative solutions to a diverse global market.
